

Wrocław University of Science and Technology Faculty of Electronics

INTERNAL PROCEDURES
of the Faculty of Electronics of Wrocław University of Science and Technology
no. 4/2015 of October 30, 2015

re. components of the thesis examination

Pursuant to §26 sec. 1 of the “Regulations of Studies at Wrocław University of Science and Technology”, I decide as follows:

1. Students pursuing their engineering projects will take a thesis examination consisting in a test of knowledge and skills whose scope and language is specified in the degree programme curriculum.
 2. Students pursuing their engineer’s or master’s thesis will take a thesis examination comprising the following:
 - a presentation of their thesis, where the form of the presentation for candidates of a specific specialisation is decided on by the President of the Thesis Examination Commission relevant to the specialisation concerned
- and
- a test of knowledge and skills; the scope and language of the test is specified in the degree programme curriculum.
3. In the test of knowledge and skills, the Commission will ask the candidate two questions, by principle, one of which is relevant to the candidate’s course in their major field of study while the other one concerns their specialisation subject.

Dean of the Faculty of Electronics
